

Names: Brianna Chery and
Abdullahi Ibrahim

Program in Computer
Engineering
Advisor: Douglas Dow

Wentworth Institute of
Technology
Boston, Massachusetts

The prototypes that will
be designed are a map,
coded in python, that
has all of the
coordinates points
plotted on it. Also, a
website that has the
map on it that is easily
accessible and user
friendly. As a result, the
user can see the
different glaciers and all
of the names and
coordinates associated
with it.
